# ColorNet Local Update Instructions

Note: An 8GB or larger USB drive is needed to complete this update transfer.

1. Go to **colornetws.com/colornetupdates** to access the ColorNet Update website.

2. If needed, click **ColorNet Update Instructions** for update instructions.

3. Next, click **Download ColorNet Update** to begin the update process.

4. The update file begins to download and the status appears in the lower left corner of your window.

5. Once the download is complete, save the Setup.zip file to your USB drive.

6. When finished, insert the USB drive into an available USB port on your ColorNet computer.

7. Next, copy the Setup.zip file to a folder on your ColorNet computer.

8. Locate and right-click the Setup.zip file on your ColorNet computer and select **Extract All.** The Setup.zip file will be extracted to the new folder identified during the extract process.

Note: Write down the location of the extracted files.

9. Go to the new folder and double-click the Setup or Setup.exe file to launch the ColorNet update.

Note: You may have to right-click on Setup and select **Run as administrator** if system security requires.

10. Follow the on-screen update instructions to complete the update.
